Data forms will usually then be keyed, typically into a personal computer or computer terminal for which a programmer has designed data entry screens that match the layout of the questionnaire.

Data analysis and interpretation - epidemiolog.net

Social network analysis (SNA) is the process of investigating social structures through the use of networks and graph theory. It characterizes networked structures in terms of nodes (individual actors, people, or things within the network) and the ties, edges, or links (relationships or interactions) that connect them.
