Thermodynamics is the branch of physics that has to do with heat and temperature and their relation to energy and work. The behavior of these quantities is governed by the four laws of thermodynamics, irrespective of the composition or specific properties of the material or system in question.

Special Issues. As of February 2015, Accounts of Chemical Research introduced a newly formatted special issue in which articles accepted for a special issue will appear online when ready in one of our regular monthly issues, while at the same time, appearing in the special issue itself being built online on its own dedicated webpage.
