The Book of ELECMOL is Online. Following the success of the previous editions of ElecMOL 1-8 (2002, 2004, 2006, 2008, 2010, 2012, 2014 and 2016), We are pleased to announce the 9th edition of the international conference ElecMol9 which will be held in Paris at the Sorbonne University in December 2018.

ABSTRACT. Nanocomposites, a high performance material exhibit unusual property combinations and unique design possibilities. With an estimated annual growth rate of about 25% and fastest demand to be in engineering plastics and elastomers, their potential is so striking that they are useful in several areas ranging from packaging to ...

This paper reviews recent research on corporate governance, with a special focus on emerging markets. It finds that better corporate governance benefit firms through greater access to financing, lower cost of capital, better performance, and more favorable treatment of all stakeholders.

Corporate governance in emerging markets: A survey

This review reports the recent advances in the most important and straightforward synthetic protocols for

incorporating catechols into (bio)polymers, and discusses the emerging applications of these innovative multifunctional materials in biomedical, energy storage and environmental applications.

Summary. A protocol is presented for the synthesis of core-shell lanthanide-doped upconversion nanocrystals (UCNs) and their cellular applications for channel protein regulation upon near-infrared (NIR) light illumination.
