Systems engineering signifies only an approach and, more recently, a discipline in engineering. The aim of education in systems engineering is to formalize various approaches simply and in doing so, identify new methods and research opportunities similar to that which occurs in other fields of engineering.

The effort to produce economically attractive composite components has resulted in several inventive manufacturing techniques. It is obvious that improvement in manufacturing technology alone is not enough to overcome the cost hurdle.

Engineering statistics combines engineering and statistics using scientific methods for analyzing data. Engineering statistics involves data concerning manufacturing processes such as: component dimensions, tolerances, type of material, and fabrication process control.

Design, Evolution and Use of KernelF (Version 1.0, June 2018) KernelF is a functional language built on top of MPS. It is designed to be highly extensible and embeddable in order to support its use at the core of domain-specific languages, realising an approach we sometimes call Funclerative Programming.
