LCD TV LCD Monitor Description The FAN7317B is a LCD backlight inverter drive IC that controls P-N full-bridge topology using a new propriety phase-shift method. The FAN7317B provides a low-cost solution and reduces external components by integrating full wave rectifiers for open-lamp protection and regulation (patent pending). The operating voltage range of the FAN7317B is wide, so an ...

LCD TV LCD Monitor Description The FAN7319 is a LCD backlight inverter drive IC that controls N-N push-pull topology or N-N full-bridge topology using a proprietary phase-shift method. The FAN7319 provides a low-cost solution and reduces external components by integrating full-wave rectifiers for voltage range is wide, so an external regulator isn't necessary to supply voltage to the IC. The ...
