Final Report: Statistical Modeling and Analysis Results

Essentially, general morphological analysis is a method for identifying and investigating the total set of possible relationships or "configurations" contained in a given problem complex.

Latent growth modeling is a statistical technique used in the structural equation modeling (SEM) framework to estimate growth trajectories. It is a longitudinal analysis technique to estimate growth over a period of time.

In this course, instructor Haydn Thomas walks through the benefits of using process modeling to help make sense of your organization's business activities and see how they interconnect. Haydn defines business process modeling, covers the most commonly used business process modeling diagrams“context, functional flow, cross-functional flow, and ...
