Adolescence is a developmental stage of life that is shaped by changes in the body and mind, and by the environment [1]. Throughout the adolescent years, the body and brain grow and change, and while becoming accustomed to these changes, the adolescent must learn to negotiate new responsibilities, evolving relationships, and a new sense of self.

Edward B. Tylor's Primitive Culture articulates one of two major theories of culture to emerge around 1870. His theory defines culture in descriptive terms as the "complex whole" that makes up social ideas

and institutions, and in this it helped to establish anthropology as a recognized science.
