Chemistry questions FIRST IONISATION ENERGIES This topic is potentially a very rich source

of exam questions. It is important that you can get questions like these right. Don't even think about doing them if you can't reliably write electronic structures for the elements. You may need a copy of the Periodic Table for some of these questions. 1. The first ionisation energy of ...

Below are some examples of critical thinking questions (CTQ) that are either superficial or don't use R. W. Paul's Six Types of Socratic Questioning. (1) What specifically is the product? While this question could be a CTQ from the clarification category, it is not a good critical thinking question because it is superficial and the information is about the product and is not relevant to ...

Since the total mechanical energy is conserved, kinetic energy (and thus, speed) will be greatest when the potential energy is smallest. Point B is the only point that is lower than point C. The reasoning would follow that point B is the point with the smallest PE, the greatest KE, and the greatest speed. Therefore, the object will have less kinetic energy at point C than at point B (only).
