

the history of multiphase pdf

In fluid mechanics, multiphase flow is simultaneous flow of (a) materials with different states or phases (i.e. gas, liquid or solid), or (b) materials with different chemical properties but in the same state or phase (i.e. liquid-liquid systems such as oil droplets in water).

By multiphase pumps a dispersion with very fine bubbles is being achieved. Therefore the multiphase pumps are also suitable as dynamic mixer. Some main applications are biofuel plants, dissolved air flotation, neutralization, water treatment, bio-reactors, crude oil water separation on oil rigs and on oil fields as well as general process ...
