the pineal organ its pdf

A gland is a group of cells in an animal's body that synthesizes substances (such as hormones) for release into the bloodstream (endocrine gland) or into cavities inside the body or its outer surface (exocrine gland).

Gland - Wikipedia

In biology, an organ system is a group of organs that work together to perform one or more functions. Each does a particular job in the body, and is made up of certain tissues.

Organ system - Simple English Wikipedia, the free encyclopedia

A biological system is a complex network of biologically relevant entities. Biological organization spans several scales. Examples of biological systems at the macro scale are populations of organisms.
